DETAILED ACTION

Information Disclosure Statement

1. The IDS filed on December 20, 2002 and February 18, 2003, have been considered. The Examiner has considered the English translations of the abstracts of the foreign language documents.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 22-31 and 41-62 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims recite an annealing temperature "of at least 550°C". The specification on page 6, teaches "greater than 400 °C", "800-1050 °C", "800-900 °C" and "most preferably 850 °C". The specification does not provide support for "at least 500 °C".

New claims 49-62, recite an annealing temperature of "at least 1050°C". This recitation is not present in the originally filed specification. The high end of the range of the annealing temperature is taught in the specification to be 1050°C.

Applicant argues that *In re Wertheim*, 191 USPQ 90 (CCPA 1976) found that a recitation of a point within the range not specifically taught by the specification is allowed. The section of the MPEP cited by Applicant (MPEP 2163.04) teaches, "(T)he inquiry into whether the description requirement is met must be determined on a case-by-case basis and is a question of fact. In *re Wertheim*, 541 F.2d 257, 262, 191 USPQ 90, 96 (CCPA 1976)." Section 2163.05 of the MPEP explains that "(I)n the decision in *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976), the ranges described in the original specification included a range of "25%- 60%" and specific examples of "36%" and "50%." A corresponding new claim limitation to "at least 35%" did not meet the description requirement because the phrase "at least" had no upper limit and caused the claim to read literally on embodiments outside the "25% to 60%" range, however a limitation to "between 35% and 60%" did meet the description requirement." In this case, "at least 35%" is a recitation for the specific example of "36%" taught in the specification. Therefore, the end points of

the range were taught by the specification. In the current application, the endpoint of "about 550°C" is not taught or described in the specification.
